W.W. Hutchison Medal

Awarded to a young individual for recent exceptional advances in Canadian Earth Science research.

2025 Hutchison Medalist

Dr. John Jamieson, *Memorial University*

Awarded for his role as an international leader in ocean exploration and marine geoscience, advancing technology for ocean research and engaging both the research community and the public to expand their knowledge and excitement about the deep sea.

Dr. John Jamieson is an Associate Professor and Canada Research Chair (Tier II) in Marine Geology at Memorial University. He is an international leader in the marine geoscience community and is pioneering the application of deep-sea technology for the mapping and study of marine mineral resources, hydrothermal vents, and marine habitat. His research on stable and radiogenic isotope systems of submarine hydrothermal vents has helped quantify metal fluxes to the oceans, with important implications for understanding marine mineral deposition throughout the geological record. Dr. Jamieson’s advancement of quantitative methods and instrumentation in ocean exploration has captured the imagination of the public and his peers who also benefit from his tireless promotion of Canada's role in international marine research programs.
